

Comparative Seed Manual: GERANIACEAE

Christine Pang, Darla Chenin, and Amber M. VanDerwarker

(Completed, January 31, 2020)

This seed manual consists of photos and relevant information on plant species housed in the Integrative Subsistence Laboratory at the Anthropology Department, University of California, Santa Barbara. The impetus for the creation of this manual was to enable UCSB graduate students to have access to comparative materials when making in-field identifications. Most of the plant species included in the manual come from New World locales with an emphasis on Eastern North America, California, Mexico, Central America, and the South American Andes.

Published references consulted¹:

1998. Moerman, Daniel E. *Native American ethnobotany*. Vol. 879. Portland, OR: Timber press.

2009. Moerman, Daniel E. *Native American medicinal plants: an ethnobotanical dictionary*. OR: Timber Press.

2010. Moerman, Daniel E. *Native American food plants: an ethnobotanical dictionary*. OR: Timber Press.

Species included herein:

Erodium trifolium

¹ **Disclaimer:** Information on relevant edible and medicinal uses comes from a variety of sources, both published and internet-based; this manual does **NOT** recommend using any plants as food or medicine without first consulting a medical professional.

Erodium trifolium

Family: Geraniaceae

Common Names: Heron's bill, Heronsbill, Storksills

Habitat and Growth Habit: This species is native to northern Africa, where it occurs in Algeria, Morocco, and Tunisia.

Human Uses: The human uses of this species are poorly documented at this time.
